

## Plug-on neutral solutions

BR & CH plug-on neutral loadcenters and circuit breakers

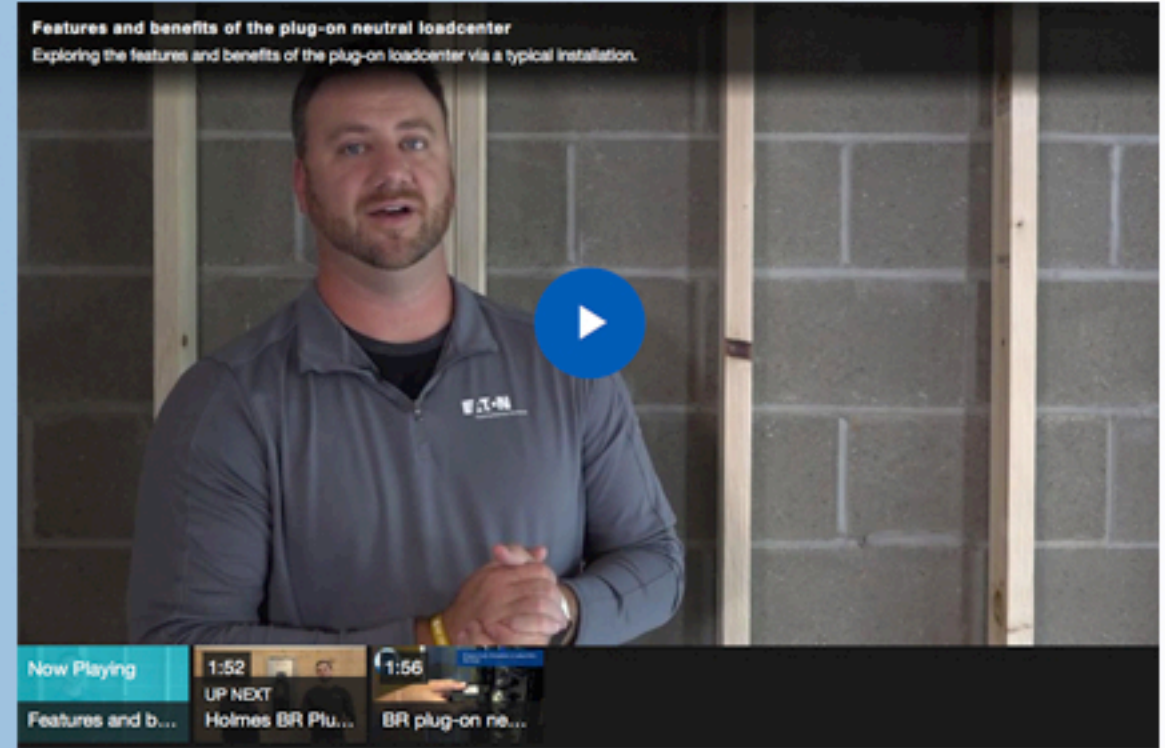

## A complete masterpiece

Your finished install will never look the same again.

We are driven by a desire to improve your experience by delivering products as professional as our customers. The BR and CH plug-on neutral portfolio offers advanced features designed to help you improve safety and ease of installation, and reduce your installation time while offering a more professional look and feel.

### FEATURES AND BENEFITS

Behold the masterfully designed BR and CH plug-on neutral portfolio. The way we see it, any product designed to make your job quicker, easier and cleaner is a thing of beauty

 **QUICK**

The BR and CH plug-on neutral loadcenter provides you a labor-saving solution through Eaton's innovative platforms, and industry-leading technology. The plug-on neutral platform provides you a cost and time saving solution that can significantly reduce installation time.

 **EASY**

The plug-on platform delivers you ease of installation with backed out neutral screws and increased gutter space. We also kept in mind safe and easy handling during installation with our enhanced smooth cased edges and self-leveling drywall offset tabs, giving back valuable time in your day.

 **CLEAN**

We understand aesthetics can be an important part of the job, which is why we made unique enhancements that will give a feeling of professional accomplishment when completing your next installation. These enhancements include eliminating the pigtail with our advanced PON breakers, embossed circuit numbers, and a rigid cover spine.

## Better by Request

Unique self-leveling tabs to allow for quick drywall offset.

Redesigned the BR electronic breakers into a short-body to optimize gutter space and save time with an easier, more succinct installation process.

Added keyhole hanging feature on cover for ease of installation.

Common drive types on screw connections for added simplicity and convenience.

Inboard neutral to increase the gutter space for easier installation of conductors.

Upgraded to embossed circuit numbers for a more clean and professional look.

Eaton's "Rock 'N' Lock" feature provides a safe and secure connection by easily rocking the breaker clip onto the redesigned in-board neutral.
